

MODERNISATION FUND **EIB CONFIRMATION OF PRIORITY INVESTMENT**

ref. MF 2021-2 SK 0-001

Beneficiary Member State: Slovak Republic

Investment Proposal: State Aid Scheme to support the production of electricity from renewable energy sources from the Modernisation Fund

1. Background

The Modernisation Fund was set up pursuant to Article 10d of Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003 establishing a system for greenhouse gas emission allowance trading within the Union and amending Council Directive 96/61/EC (the “ETS Directive”).

The legal basis for the operation of the Modernisation Fund is set out in the Commission Implementing Regulation (EU) 2020/1001 of 9 July 2020 laying down detailed rules for the application of Directive 2003/87/EC of the European Parliament and of the Council as regards the operation of the Modernisation Fund supporting investments to modernise the energy systems and to improve energy efficiency of certain Member States (the “Implementing Regulation”).

In accordance with Article 10d(6) of the ETS Directive, the European Investment Bank (the “EIB”) is to confirm whether a proposed investment falls into a priority area. The EIB may confirm the proposal as a priority investment if the conditions specified in Article 6(7) of the Implementing Regulation are met.

2. Investment proposal

Pursuant to Article 4(1) of the Implementing Regulation, on 14/09/2021 the Slovak Republic submitted to the EIB an investment proposal "State Aid Scheme to support the production of electricity from renewable energy sources from the Modernisation Fund" for which it envisages a contribution from the Modernisation Fund (Modernisation Fund reference number MF 2021-2 SK 0-001).

The main objective of the investment is to increase the share of renewable energy sources in final energy consumption of the Slovak Republic.

The investment proposal concerns a scheme for the period 2021-2030 relating to investments into new projects aimed at the use of solar and wind energy to generate electricity (approximately 335 MW of renewable electricity generation capacity).

The support from the Modernization Fund will help the Slovak Republic to meet the objectives set in the National Energy and Climate Plan (NECP) to increase the share of RES in gross final energy consumption of the Slovak Republic.

Energy from solar and wind is defined as energy from renewable sources in Article 2, paragraph 1 of Directive EU 2018/2001 on the promotion of the use of energy from renewable sources and the investment proposal therefore constitutes a priority investment.

The beneficiary Member State has requested funding of EUR 20 000 000 for a first disbursement under the proposed scheme.

The beneficiary Member State has indicated an expected Modernisation Fund funding for the investment proposal of EUR 250 000 000.

3. Compliance with the conditions for priority investment.

- a) The beneficiary Member State has demonstrated that the investment complies with the requirements laid down in Article 10d(1) of the ETS Directive as it supports the modernisation of the energy system and it is in line with the objectives set out in in the National Energy and Climate Plan.
- b) According to the information provided by the beneficiary Member State and pursuant to Article 10d(2) Directive 2003/87/EC, the investment is considered as a priority investment as it falls under the priority area "generation of electricity from renewable sources".
- c) The beneficiary Member State has sufficient funds available for the requested disbursement according to the statement of the available funds referred to in Article 5(1) of the Implementing Regulation and after deduction of any amounts to be disbursed for investments already confirmed in accordance with Article 6(9) of the Implementing Regulation.
- d) The beneficiary Member State has provided evidence that the projects under the investment proposal are exempted from the State aid notification in accordance with Commission Regulation (EU) No 651/2014 of 17 June 2014 declaring certain categories of aid compatible with the internal market in application of Articles 107 and 108 of the Treaty.
- e) The beneficiary Member State has confirmed in writing that the investment complies with any other applicable requirements of Union and national law.
- f) According to the information provided by the beneficiary Member State, the amounts requested from the Modernisation Fund are not intended to cover the same costs of the investment as those financed by another Union or national instrument.

4. Conclusions

The EIB has assessed the investment proposal based on the information submitted by the beneficiary Member State in accordance with Article 4 and Annex 1 of the Implementing Regulation and it has concluded that the investment proposal has met the conditions specified in Article 6(7) of the Implementing Regulation.

In view of the above, and in reliance on the information and evidence provided and the confirmations given by the beneficiary Member State as described at paragraph 3 above, the EIB confirms the proposal “State Aid Scheme to support the production of electricity from renewable energy sources from the Modernisation Fund” (Modernisation Fund reference number MF 2021-2 SK 0-001) as a priority investment.

This confirmation, being based in part upon an exemption from State aid notification that is limited in time, is made on the assumption that the investment proposal, if it constitutes State aid after the expiry of such time limit, will continue to be exempted from State aid notification or that the beneficiary Member State will either obtain State aid clearance or cease to finance the investment proposal with Modernisation Fund funds at that time. As implied by Article 6(8) of the Implementing Regulation, the beneficiary Member State, when submitting a proposal concerning a subsequent disbursement for the scheme, may propose changes to the scheme for re-assessment.

This confirmation is without prejudice to the requirement for a disbursement decision to be made pursuant to Article 10d(3) of the ETS Directive.
