

MODERNISATION FUND
Accelerating the transition to climate neutrality

IC Recommendation on Non-Priority Proposal

**MF 2022-1 CZ 1-004 “Scheme (Part 2A):
Modernization of energy sources to biomass
without CHP ”**

1. Background

The Modernisation Fund was set up pursuant to Article 10d of Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003 establishing a system for greenhouse gas emission allowance trading within the Union and amending Council Directive 96/61/EC (ETS Directive).

Detailed rules on the operation of the Modernisation Fund (MF) are set in the Commission Implementing Regulation (EU) 2020/1001 of 9 July 2020 laying down detailed rules for the application of Directive 2003/87/EC of the European Parliament and of the Council as regards the operation of the Modernisation Fund supporting investments to modernise the energy systems and to improve energy efficiency of certain Member States (Implementing Regulation).

In accordance with Article 10d(6) of the ETS Directive, where an investment in the modernisation of energy systems, which is proposed to be financed from the Modernisation Fund, does not fall into the areas listed in paragraph 2 of Article 10d, the investment committee shall assess the technical and financial viability of that investment, including the emission reductions it achieves, and issue a recommendation on financing the investment from the Modernisation Fund.

The Investment Committee may issue a recommendation on financing the investment from the Modernisation Fund, if the conditions specified in Article 7(7) of the Implementing Regulation are met.

2. Investment proposal

Pursuant to Article 4(1) of the Implementing Regulation, on 20/01/2022, the Czech Republic (the "beneficiary Member State") submitted to the EIB the investment proposal "Scheme (Part 2A): Modernisation of energy sources to biomass without CHP non-priority investments of the Programme "ENERG ETS" (Improvement of energy efficiency and reductions of emissions of greenhouse gases in EU ETS industry) " for which it envisages a contribution from the MF (MF reference number MF 2022-1 CZ 1-004).

The main aim of the proposed investments under the investment is the modernisation of energy sources and fuel base switch in the heat supply sector, with primary objectives of a substantial improvement in energy efficiency and emission reductions.

The scheme supports the replacement of the energy source with a change of the fuel used or type of energy to renewable energy sources (RES), without high-efficiency combined heat and power (CHP).

It assumes:

- transition to biomass from lignite: 2 heat only boiler projects;
- transition to biomass from coal: 1 heat only boiler projects;
- transition to biomass from natural gas: 1 heat only boiler projects.

The final beneficiaries targeted by the scheme are entities operating the EU ETS installations in the Czech Republic.

The investment proposal indicates that the expected emission reduction resulting from the implementation of the scheme is 254 000 tons of CO_{2eq} / year.

3. Compliance with the conditions for non-priority investment.

- a) Czech Republic has demonstrated that the investment complies with the requirements laid down in Article 10d(1) of the ETS Directive.
- b) Czech Republic has sufficient funds available according to the statement of the available funds referred to in Article 5(1) of the Implementing Regulation and after deduction of any amounts to be disbursed for investments already confirmed in accordance with Article 6(9) of the Implementing Regulation.
- c) The share of the funds allocated to priority investments is at least 70 % of the total amount of funds used by Czech Republic, as defined in Article 7(7)(c) of the Implementing Regulation.
- d) Czech Republic has confirmed in writing that up to 70% of the relevant costs of investments will be supported with resources from the Modernisation Fund and the remaining costs will be financed by private legal entities.
- e) Czech Republic has provided evidence that the investment proposal has obtained State aid clearance in accordance with the Commission decision C(2022) 553.
- f) Czech Republic has confirmed in writing that the investment complies with any other applicable requirements of Union and national law.
- g) According to the information provided by the beneficiary Member State, the amounts requested from the Modernisation Fund are not intended to cover the same costs of the investment as those financed by another Union or national instrument.

4. Recommendations

- a) The Investment Committee recommends financing of the investment proposal “Scheme (Part 2A): Modernisation of energy sources to biomass without CHP non-priority investments of the Programme “ENERG ETS” (Improvement of energy efficiency and reductions of emissions of greenhouse gases in EU ETS industry).” from the Modernisation Fund as a non-priority investment.
- b) The requested amount of the first disbursement from the Modernisation Fund for the scheme is EUR 10 000 000.

5. Justification for recommendations

The Investment Committee deems support from the MF is justified for the following reasons:

- a) The investment proposal meets conditions specified in Article 7(7) of the Implementing Regulation.
- b) The European Investment Bank has carried out a technical and financial due diligence of the Implementing Regulation and transmitted to the Investment Committee, as required by Article 7, (2)-(6). The due diligence was based on documents and information provided by the Beneficiary Member State.
- c) Based on the information provided and having considered the scope of the investment proposal, including its costs, the EIB expressed the positive opinion on the technical, financial and expected emission reduction aspects of the investment proposal.
- d) The representative of the European Investment Bank has endorsed financing the investment proposal from the Modernisation Fund.
- e) The investment proposal is consistent with Article 10d(1) of Directive 2003/87/EC. It supports modernisation of energy systems by the means of supporting transition from fossil fuels to lower carbon intensity fuels. It is also consistent with the EU 2030 climate and energy policy and it is in line with the objectives set out in the NECP for the Czech Republic.
- f) The investment proposal is consistent with Article 10d(6) of Directive 2003/87/EC. A 10% increase in energy efficiency is one of the conditions to be stated in the programme for investments to be eligible for MF funding. The scheme supports the replacement of the energy source with a change of the fuel used to renewable energy sources (RES biomass).

6. Suggestions regarding application of the financing instruments (if applicable)

The Investment Committee has no suggestions regarding the application of the financing instruments.

Investment Committee, 7 April 2022
