MODERNISATION FUND
Accelerating the transition to climate neutrality

MODERNISATION FUND **EIB CONFIRMATION OF PRIORITY INVESTMENT**

ref. MF 2023-1 RO 0-002

Beneficiary Member State: Romania

Investment Proposal: Supporting investments in new production capacities of electricity produced from renewable sources – solar, wind and hydro

1. Background

The Modernisation Fund was set up pursuant to Article 10d of Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003 establishing a system for greenhouse gas emission allowance trading within the Union and amending Council Directive 96/61/EC (the “ETS Directive”).

The legal basis for the operation of the Modernisation Fund is set out in the Commission Implementing Regulation (EU) 2020/1001 of 9 July 2020 laying down detailed rules for the application of Directive 2003/87/EC of the European Parliament and of the Council as regards the operation of the Modernisation Fund supporting investments to modernise the energy systems and to improve energy efficiency of certain Member States (the “Implementing Regulation”).

In accordance with Article 10d(6) of the ETS Directive, the European Investment Bank (the “EIB”) is to confirm whether a proposed investment falls into a priority area. The EIB may confirm the proposal as a priority investment if the conditions specified in Article 6(7) of the Implementing Regulation are met.

2. Investment proposal

Pursuant to Article 4(1) of the Implementing Regulation, on 15/02/2023 Romania (the “beneficiary Member State”) submitted to the EIB an investment proposal “Supporting investments in new production capacities of electricity produced from renewable sources – solar, wind and hydro” for which it envisages a contribution from the Modernisation Fund (Modernisation Fund reference number MF 2023-1 RO 0-002).

The investment proposal concerns a scheme for the period 2023-2026 relating to the construction of at least 598 MW of installed capacity, composed of: 143 MW in wind energy, 400 MW in solar energy and 55 MW in hydro energy.

The beneficiary Member State has requested funding of EUR 250 000 000 for a disbursement under the proposed scheme.

The beneficiary Member State has indicated an expected Modernisation Fund funding for the investment proposal of EUR 400 000 000.

The main objective of the investment is to support the development of new renewable energy production capacities (wind, solar and hydro) that will contribute to an increased share of renewable energy sources in the energy mix and reduction of greenhouse gas emissions.

Increasing the share of renewable energy is included in the objectives and measures of the National Energy and Climate Plan (NECP) for Romania aiming at supporting the development of new renewable energy capacities of approximately 6.9 GW until 2030.

3. Compliance with the conditions for priority investment

- a) The beneficiary Member State has demonstrated that the investment complies with the requirements laid down in Article 10d(1) of the ETS Directive as it supports the modernisation of the energy system and it is in line with the objectives and measures set out in its NECP.
- b) According to the information provided by the beneficiary Member State and pursuant to Article 10d(2) Directive 2003/87/EC, the investment is considered as a priority investment as it falls under the priority area “generation of electricity from renewable sources”.
- c) The beneficiary Member State has sufficient funds available for the requested disbursement according to the statement of the available funds referred to in Article 5(1) of the Implementing Regulation and after deduction of any amounts to be disbursed for investments already confirmed in accordance with Article 6(9) of the Implementing Regulation.
- d) The beneficiary Member State has provided evidence that the measures under the investment proposal:
 - a. are exempted from the State aid notification in accordance with Commission Regulation (EU) No 651/2014 of 17 June 2014 declaring certain categories of aid compatible with the internal market in application of Articles 107 and 108 of the Treaty on the Functioning of the European Union.
- e) The beneficiary Member State has confirmed in writing that the investment complies with any other applicable requirements of Union and national law.

- f) According to the information provided by the beneficiary Member State, the amounts requested from the Modernisation Fund are not intended to cover the same costs of the investment as those financed by another Union or national instrument.

4. Conclusions

The EIB has assessed the investment proposal based on the information submitted by the beneficiary Member State in accordance with Article 4 and Annex 1 of the Implementing Regulation and it has concluded that the investment proposal has met the conditions specified in Article 6(7) of the Implementing Regulation.

In view of the above, and in reliance on the information and evidence provided and the confirmations given by the beneficiary Member State as described at paragraph 3 above, the EIB confirms the proposal “Supporting investments in new production capacities of electricity produced from renewable sources – solar, wind and hydro” (Modernisation Fund reference number MF 2023-1 RO 0-002) as a priority investment.

This confirmation, being based in part upon an exemption from State aid notification that is limited in time, is made on the assumption that the investment proposal, if it constitutes State aid after the expiry of such time limit, will continue to be exempted from State aid notification or that the beneficiary Member State will either obtain State aid clearance or cease to finance the investment proposal with Modernisation Fund funds at that time. As implied by Article 6(8) of the Implementing Regulation, the beneficiary Member State, when submitting a proposal concerning a subsequent disbursement for the scheme, may propose changes to the scheme for re-assessment.

This confirmation is without prejudice to the requirement for a disbursement decision to be made pursuant to Article 10d(3) of the ETS Directive.
